

ABOUT CPP

The Construction Partnership Program (CPP) is a joint agency effort underway to begin

preparing for the unprecedented amount of infrastructure improvements scheduled to take place throughout Central Texas over the next 10 years.

Between highway reconstruction, a brand new transit system build-out, an international airport expansion, a convention center redevelopment and expansion as well as multiple private development projects, coordinating construction is essential.

The CPP will enable agency partners to better coordinate with each other, inform the public, and keep Central Texas moving throughout peak construction, as well as set a foundation for long-term interagency coordination, mobility and safety enhancements.

CPP MISSION:

Keep Central Texas safe, moving, and informed during an unprecedented amount of transportation construction that will impact our community while we build the future.

REGIONAL OPPORTUNITIES:

35+

significant projects under construction (2023-2032)

\$20+ BILLION

in construction funding (2023-2032)

27%

increase in population (2022-2032)

DESIRED OUTCOMES:

Prioritize Safety

Reduce Community Impacts

Maintain Mobility and Accessibility for All

Inform the Public

Speak with One Voice

Manage Surprises and Conflicts

Coordinate and Share Resources

INITIAL CPP PARTNERS

COLLABORATING TO FIND SOLUTIONS:

Develop an integrated information sharing platform to receive construction information from the projects.

Forecast and maintain situational awareness across construction projects to coordinate with CPP Partners.

Explore strategies to streamline public information during construction.

Cooperate with business/industry and the community to reduce and manage traffic demand.

Create a CPP that can be merged into an emerging next generation "smart city" transportation management center.
